**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 14-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, as originally filed, fails to provide antecedent basis for the recitation "a sealing print formed on outermost periphery portions of both said face and said back, said outermost periphery portions abutting said edge, the sealing print crossing said edge so as to extend from said face to said back without discontinuity". This is a new matter rejection.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 14-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 203,091 to Taylor.

Regarding claim 17, the back of the Taylor envelope is considered to be "prepared with a portion for carrying notice" to the same degree the claims set forth the metes and bounds of the term "prepared".

5. Claims 14-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 1,091,028 to Wroegeer.

Regarding claim 17, the back of the Wroegeer envelope is considered to be "prepared with a portion for carrying notice" to the same degree the claims set forth the metes and bounds of the term "prepared".

6. Claims 14-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 1,714,349 to Dahlke.

Regarding claim 17, the back of the Dahlke envelope is considered to be "prepared with a portion for carrying notice" to the same degree the claims set forth the metes and bounds of the term "prepared".

7. Claims 14-18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 5,478,010 to Vaucher.

Regarding claim 17, the back of the Vaucher envelope is considered to be "prepared with a portion for carrying notice" to the same degree the claims set forth the metes and bounds of the term "prepared".

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor, Wroeger or Dahlke and U.S. Patent No. 5,205,649 to Fullerton.

Taylor, Wroeger and Dahlke each disclose the claimed device except for the face being formed with a transparent window. Fullerton discloses that it is known in the art to provide the face of another tamper evident package with a transparent window. See column 5, lines 19-23. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the face of the Taylor, Wroeger or Dahlke envelopes with the transparent window of Fullerton, in order to allow viewing of the contents without opening the package.

***Response to Arguments***

10. Applicant's arguments with respect to claims 14-18 have been considered but are moot in view of the new grounds of rejection.

***Response to Amendment***

11. Applicant's remarks, filed 12/20/2006, fail to specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.

***Conclusion***

12. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
